

Astrophysicist

written by Saarani Vengadesen | 04/07/2021

Ever thought of becoming an astrophysicist?

[Astrophysics](#) is a worthy option for people who are always fascinated by astronomy and curious about how the universe works. Yes! [Dark energy](#), [black holes](#), [galaxies](#), [stars](#) and [exoplanets](#) come under astrophysics. They apply physics, mathematics and computing knowledge to study the formation of stars, planets and galaxies.

The work nature of an astrophysicist can expect the following characteristics:

- Interpretation of a large amount of data
- Application of in-depth mathematics and research skills
