Cybersecurity Analyst

written by Saarani Vengadesen | 04/07/2021

Cybersecurity analysts are in high demand as we move towards <u>digitalisation</u>. The analyst's primary role is to understand a company's <u>IT infrastructure</u> and protect its network from <u>cyberattacks</u>.

Top Skills required for a cybersecurity analyst:

- Fundamental computer forensic skills
- An understanding of hacking
- Attention to details
- Communication skills
