[Broccoli](#), [cabbages](#) and [kai lan](#) are all cultivars of *Brassica oleracea* (wild cabbage). Throughout the centuries, farmers from all across the globe have artificially selected plants of this species that exhibited specific features. For example, farmers that selected plants that had enlarged flowering structures lead to the cultivation of [cauliflowers](#). Other vegetables that are also cultivars of *B. oleracea* are [kohlrabi](#), [kale](#) and [Brussels sprouts](#).
